

EDA - Project

Matthis Westermann

Dataset: King County House prices

Table of content

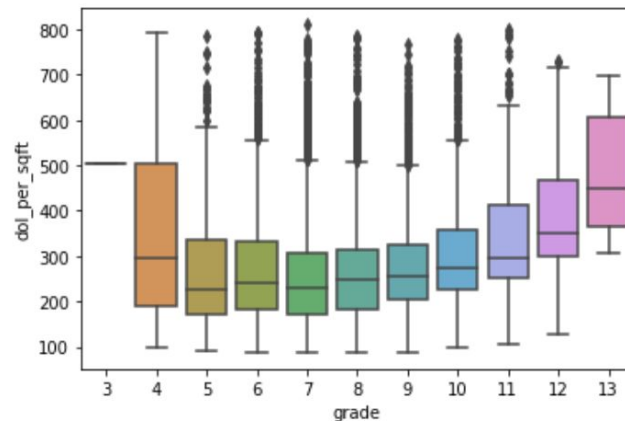

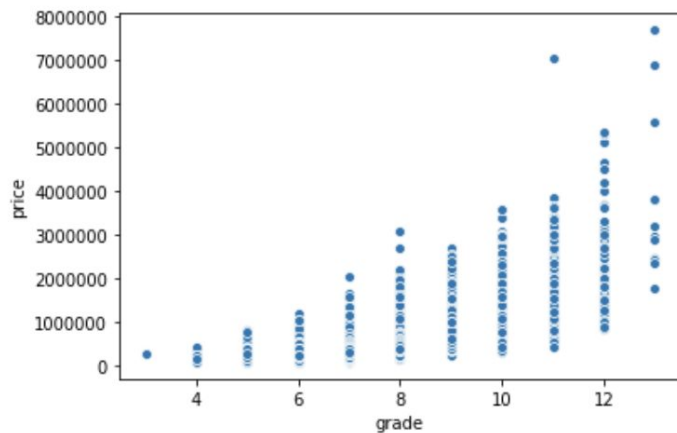

- Overall methodology
- Insights by plotting
- Interactive dashboard

1. Overall methodology

- Setting up the notebook
- Working with the data
- Defining the Model
- Testing the data with cross validation

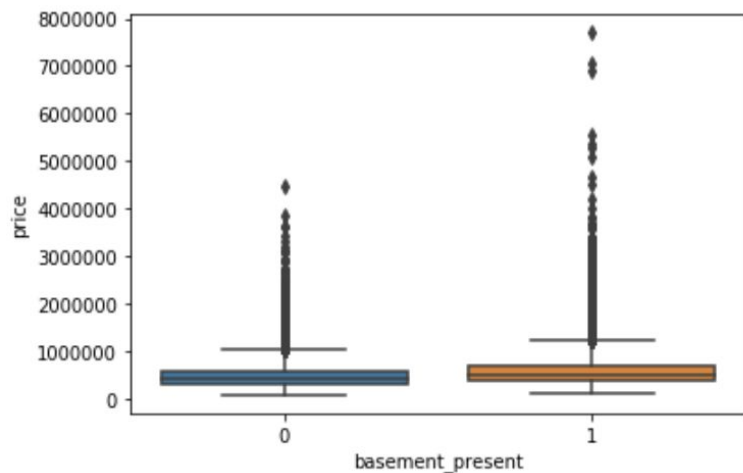

2. Insights by plotting

- Scatterplot → correlation between grade and price
- Boxplot → relation between grade and dollar per square feet

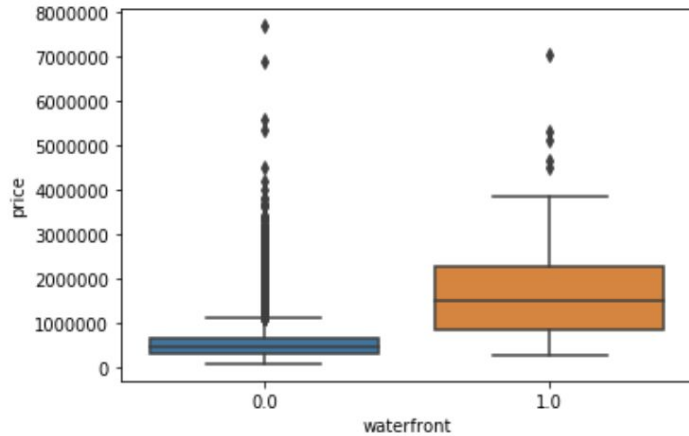

2. Insights by plotting

- Boxplot: presence of a basement and price

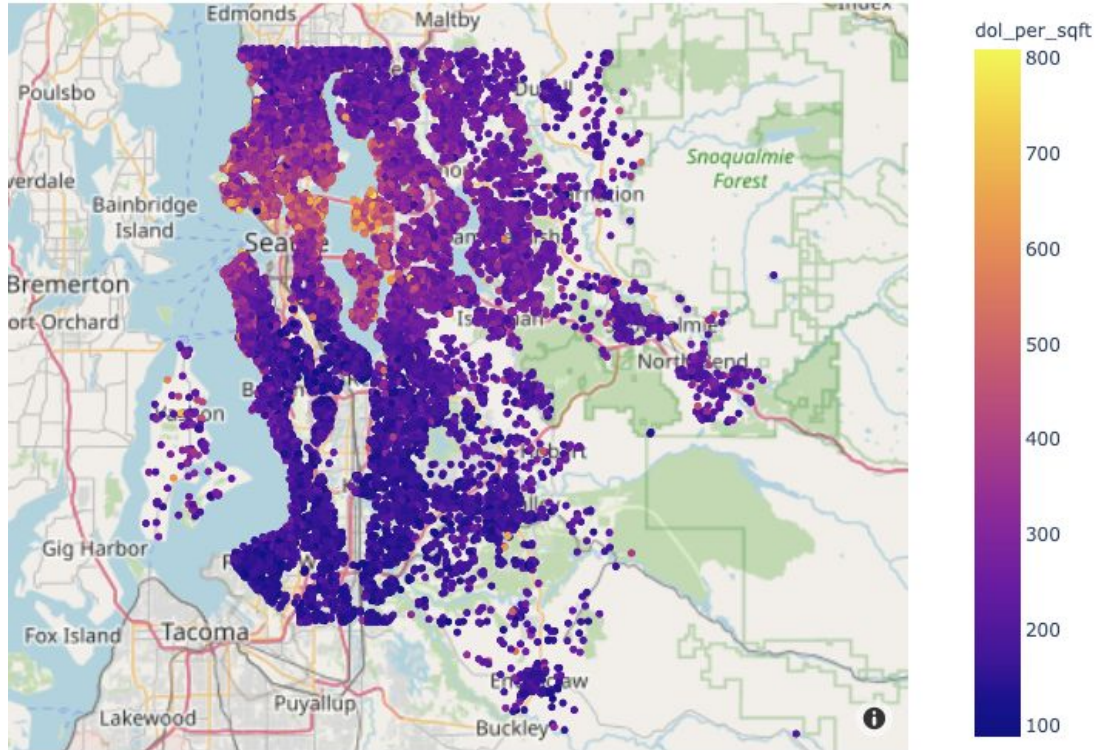

2. Insights by plotting

- Boxplot: Waterfront location and price

3. Interactive dashboard
